

Pipe Organ Available

The First United Church of Christ in Marion, Ohio would like to place their 1951 2-manual, 10 rank Schantz pipe organ with a church or organization that would appreciate it. Their congregation has moved out of their current church building which will be taken down, thus making the instrument available. They are willing to help with the cost of removal to ensure that it will have a new opportunity. The organ has been regularly maintained and is in excellent playing condition.

If you are interested, they will send you a flash drive that includes recordings and pictures of the console, keyboard, pipes, and specifications and measurements of the organ.
